

Identifying Partners to Engage

Think about which partners to engage at each stage of the research. Organize your thoughts by filling out the table below (you may not need to fill in every cell).

Research Activity	Partner				
	People With Lived and Living Experience	Clinicians	Community Organizations	Trusted Messengers	Policymakers
Define the research question					
Choose relevant outcome variables					
Design a research protocol					
Define criteria for including/excluding participants					
Draft/revise study materials and protocols					
Recruit participants					
Monitor participant data and safety					
Collect data					
Analyze data					
Identify findings					
Interpret findings
